NIAGARA
COBBLESTONE DRUM

Midea ‘Niagara’ series washing machine with cobblestone drum is designed by Midea’s R&D team using multiple technological innovations inspired by Mother Nature.

This natural design provides the closest simulation to hand wash, preventing wrinkles and clothing going out of shape, leaving clothes cleaner and softer as if they have been given a spa treatment. The massaging motion on the clothing during wash cycle effectively produces a deeper yet more gentle cleaning result with ultra-low wear and tear compared to ordinary washing machine.
